CHRISTMAS CATALOGUE 2022

Christine Gardner

Creating Little pieces of happy

It all started 6 years ago when on maternity leave, searching for the ideal Christening invite that couldn't be found! I designed my own and that was that.

Six years later, Christine Gardner Design is a full time career after quitting corporate life and living the dream of running my own stationery and homewares business.

So now I spend my days designing little pieces of happy to brighten peoples days, uplift, and spread joy.

This includes modern floral and contemporary themed stationery designs all printed in the UK working with excellent British manufacturers using FSC-certified paper stocks and the best materials.

Designs are often inspired by the landscape and nature that surrounds the studio in West Sussex but are also inspired by family and the things we like, enjoy, and do!

Work is created by hand with pens and pencils and then moved into a digital format where pattern layouts, colour swatches and final designs come together.

I hope you enjoy my catalogue and hope you will buy, stock and love my cards and wrap as much as I do!

Being sustainable this Christmas

Our new relation card designs have no foil and no glitter on them - just lovely drawings on premium FSC certified card stock. We are now using recyclable card clasps too.

Our wrap is uncoated (none of that shiny stuff that can contain plastic) and is 100% recyclable.

Our gorgeous grosgrain ribbons are recycled from plastic bottles! This ribbon can also be ironed and reused after use too!

On the reverse of our cards cherishing, recycling or reusing is encouraged. Check out our gift tag suggestions!

We've kept our catalogue digital. Saving on paper, ink and manufacturing. Plus this means we can keep you up to the minute if things go out of stock...

Tags come without ribbon so they are 100% recyclable (yes, the foil can be recycled!) - but ribbon can be added if you like!
